

## Northeast States Hazardous Waste Codes

<b>Connecticut</b>	
CR01	Waste PCBs with concentrations greater than or equal to 50 ppm
CR02	Waste oil
CR03	Wastewater soluble oil
CR04	Waste chemical liquids that are toxic, hazardous to handle, and/or may cause contamination of ground and/or surface water
CR05	Waste chemical solids and semi-solids
	Note: the above codes apply only to non-RCRA-hazardous wastes in Connecticut. They are <b>not</b> state hazardous waste codes. However, these wastes are required to be shipped by permitted transporters in Connecticut (except for waste code CR05), & facilities that store, treat, or dispose of these wastes in Connecticut must have a state operating permit.
<b>Maine</b>	
M002	PCB toxic waste
K###	Process specific wastes not federally listed (call for more info)
P###	Chemical specific wastes not federally listed (call for more info)
U###	Chemical specific waste not federally listed (call for more info)
<b>Massachusetts</b>	
MA00	Hazardous waste as designated by 310 CMR 30.144
MA01	Waste Oil
MA02	PCB waste >50 ppm
MA04	Waste paint from paint manufacturers that is not characteristic hazardous waste or listed hazardous waste but contains listed constituents
MA95	Universal waste shipped on hazardous waste manifest by a licensed hazardous waste transporter
MA97	Class A regulated recyclable material (including but not limited to used oil fuel) that is shipped on a hazardous waste manifest
MA98	Off-specification used oil fuel that is shipped using a hazardous waste manifest
MA99	Not hazardous waste
<b>New Hampshire</b>	
NHX1	Exempt, recycled hazardous waste
NH01	Used Oil
NH02	Corrosive Solid

<b>New Jersey</b>	
No state waste codes	
<b>New York</b>	
<p><b>1. PCB Waste 6 NYCRR Part 371.4(e)</b> All solid wastes containing 50 parts per million (ppm) by weight (on a dry weight basis for other than liquid wastes) or greater of polychlorinated biphenyls (PCBs) are listed hazardous wastes, excluding small capacitors as defined in paragraph (3) of this subdivision &amp; PCB articles drained in accordance with subparagraphs (2)(ii) &amp; (iii) of this subdivision.</p>	
B001	PCB oil (concentrated) from transformers, capacitors, etc.
B002	Petroleum oil or other liquid containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs. This includes oil from electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers, rectifiers & cable.
B003	Petroleum oil or other liquid containing 500 ppm or greater of PCBs.
B004	PCB articles containing 50 ppm or greater of PCBs, but less than 500 ppm PCBs, excluding small capacitors. This includes oil-filled electrical equipment whose PCB concentration is unknown, except for circuit breakers, reclosers, rectifiers & cable.
B005	PCB articles, other than transformers, that contain 500 ppm or greater of PCBs, excluding small capacitors.
B006	PCB transformers. <i>PCB transformers</i> means any transformer that contains 500 ppm PCB or greater.
B007	Other PCB wastes, including contaminated soil, solids, sludges, clothing, rags, & dredge material.
<p><b>2. NY Special Assessment Manifest Requirement 6 NYCRR Part 372.2(b)(2)</b> (ii) for each hazardous waste listed in Item 9 of the manifest, confirm with the designated facility what the ultimate disposal method will be for that waste. If the receiving TSD facility is not providing a hazardous waste management code in item 19 that reflects the ultimate disposal method for the hazardous waste, the generator must provide a State waste code in Item 13 of the manifest to designate the ultimate disposal method of the hazardous waste using one of following state codes:</p>	
	L = Landfill
	B = Incineration, heat recovery, burning
	T = Chemical, physical, or biological treatment
	R = Material recovery of more than 75 percent of the total material
<b>Rhode Island</b>	
R001	Electronics
R006	Extremely hazardous waste
R007	PCB waste $\geq$ 50 ppm
R009	Mercury containing waste

R010	Waste used oil
R011	Secondary waste generated by a hazardous waste management facility as a result of treatment
R012	Precious metal bearing waste
R013	Household hazardous waste
R014	Waste used oil shipped to state that regulates it
R015	Waste not meeting the definition of hazardous waste that is required to be on a manifest by the destination state
R016	Removal action waste generated by RI DEM / US EPA if the governing body is not responsible party
<b>Vermont</b>	
VT01	Wastes containing PCBs in concentrations $\geq 50$ parts per million
VT02	Waste containing greater than 5% by weight of petroleum distillates with melting points of less than 100°F, (e.g., fuel oil, hydraulic oils, automotive oils)
VT03	Wastewater-miscible metal cutting & grinding fluid
VT06	Pesticidal wastes & obsolete pesticidal products not specifically listed in subchapter 2 & regulated by the VT Department of Agriculture; excludes certain products such as citronella candles
VT08	Waste ethylene glycol & solutions containing $> 700$ parts per million of ethylene glycol (e.g., coolants, antifreeze)
VT11	Wastes determined to be hazardous pursuant to § 7-213 or § 7-216
VT20	A solid material that when mixed with an equal weight of distilled water causes the liquid fraction of the mixture to exhibit the properties of corrosivity characteristic as specified in § 7-206(a)(3)
VT99	Non-hazardous waste; tax exempt materials on manifests
	Codes for PFOA & PFOS $>20$ ppt
