Subject: HW Call on State & Other P2 Information Resources

From: Bill Cass
To: NEWMOA HW Training Committee
Sent: Wednesday, January 2, 2008

Happy New Year! I apologize for this late notice that a HW/P2& Assistance call to review **State and other Information Resources for Substitution of Non-Hazardous Materials/Process Change for Common Industrial Processes** is planned for **10:00 a.m. on Tuesday, January 8, 2008**. EPA participation is invited. To participate please **call (800) 524-3432 and enter the passcode 857728 when it is requested.**

Please Forward to Those Who May Wish to Participate

Please reply to confirm your program's participation and to identify who will summarize your state's program and resources..

Agenda

Liz Harriman of the Toxics Use Reduction Institute at U. Mass. Lowell has agreed to provide a briefing on a recent study concerning substitutes for five commonly used industrial hazardous materials. A link to the study report will follow. State HW/P2& Assistance program managers/designees are asked to briefly outline their state's program and information resources regarding greening common industrial processes. Discussion, Q&A and determination of any follow-up activities by NEWMOA/other participants will follow. I have attached the listing of links to state P2 information resources that Terri Goldberg prepared recently. Please forward any background materials that would be of interest to participants to me or directly to addressees.

I believe that it is CT DEP's turn to capture the highlights of this call. I'll look forward to hearing from you.
