Training Resources

Video Library

This page allows access to a variety of resources used in RCRA-specific online course material. Use the file manager to select the resource item(s) that you are interested in. Resource items are generally Microsoft PowerPoint presentations that contain information relevant to the training topics.

The best place to start is with the Independent Development Plans (IDPs) located at <https://ertpvu.org/RCRA/Documents/IDPs and EPA-State Calls/RCRA IDP-ERTPVU.xlsx>. The IDPs are organized by 14 different subject matter areas (e.g., basic curriculum, permitting). All trainings relevant to those areas are linked from within the IDPs, including links to the resource items, webinars, and videos. To access a training, click on the respective link. **Note:** some links will need to be cut and pasted into your browser and are noted as such.
